EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Scott Thorpe on December 15, 2008.

The application has been amended as follows:

- Claims 13-20 have been canceled.
- Claims 4, 6, and 8 have been amended to depend from claim 1.
- Claim 24 has been added and recites the following: --A system for compactly storing computing devices, comprising: a display device; a keyboard; an integrated pointing device; a computer equipment rack; an upper support comprising a rigid material forming a planar vertical back with substantially perpendicular edge protrusions along planar vertical back edges and configured to receive the display device; a lower support comprising a rigid material forming a tray configured to receive the keyboard and the integrated pointing device; and a mounting mechanism that connects the upper support to the lower support and allows the upper support and the lower support to transition between an access position and a vertical storage position, the mounting mechanism mounted to a divider panel of the computer equipment rack such that the vertical

storage position is outside of the computer equipment rack and places the upper support and lower support behind a face of the computer equipment rack, wherein the computer equipment rack is configured to mount equipment with a height that is an integer multiple of 44.45 millimeters and the face is configured as a virtual vertical plane of the computer equipment rack wherein a user may access equipment mounted within the computer equipment rack.--

- Claim 25 has been added and recites the following: --The system of claim 24, wherein the mounting mechanism is configured to slide the upper support and lower support between the access position and the vertical storage position.--
- Claim 26 has been added and recites the following: --The system of claim 24, wherein the access position comprises the lower support at least partially in a non-vertical orientation.--
- Claim 27 has been added and recites the following: --The system of claim 24, wherein the access position comprises the upper support at least partially in a non-vertical orientation.--

The following is an examiner's statement of reasons for allowance: The closest prior art is US Patent No. 6,783,105 to Oddsen, Jr. (hereafter "Oddsen"). Oddsen discloses an adjustable arm for supporting and displaying electronic components related to computers (see FIG. 1; BACKGROUND OF THE INVENTION). The arm

transitions between an access position (see, e.g., FIG. 1) and a vertical storage position (see, e.g., FIG. 1). The arm supports an upper support, which is configured to support a display device, and a lower support, which is configured to support a keyboard and an integrated pointing device (see FIG. 1). Unlike the independent claims of the instant invention, Oddsen does not disclose the arm as mounting to the divider panel of a computer equipment rack; rather, Oddsen teaches mounting to a wall (col. 5, lines 3-17). As shown, for example, in Figure 2B, the apparatus of the instant invention mounts to the side of a computer rack or to a divider panel located on the side of the computer rack. It is important to note that the instant invention as claimed requires mounting *outside* of the computer rack in a manner that allows placement of the upper support and lower support behind a face of the computer equipment rack in the storage position.

US Patent No. 6,945,412 to Felcman et al. (hereafter "Felcman") discloses a computer rack wherein a computer equipment support apparatus is stored *inside* of the rack (see FIGS. 4 and 5). As discussed by the Board of Patent Appeals and Interferences, it would not have been obvious to one of ordinary skill in the art at the time of the invention to combine the arm disclosed by Oddsen with the rack disclosed by Felcman, to arrive at the claimed invention (see BPAI Decision (Examiner Affirmed in Part), September 9, 2008). The BPAI reasoned that the combination would result in either (1) the arm of Oddsen mounted *within* the rack of Felcman, or (2) the arm of Oddsen mounted on a wall *near* the rack of Felcman. The combination of Felcman and Oddsen, therefore, does not render the independent claims of the instant invention obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patent No. 7,133,289 to Arippol.
